

# HIGH PRESSURE HOSE CRIMPING MACHINE

## INTRODUCTION:

This kind of hose crimping machine is our new product. The die holder is adopted new technology of grinding. It can solve the problem of circular degree and taper in crimping machine. After the technician calculate and analysis, we can make the mold base split degree to realize one time installed qualified rate reached 100%.

# HIGH PRESSURE HOSE CRIMPING MACHINE

## FEATURES:

- The operating system more advanced, repeat precision is more accurate.
- Equipped with protection adapter which protect dies against the failure installation.
- The die shelf can be taken apart.
- Increasing the opening and good passing performance.

## TECHNICAL DATA:

Swaging Force	640 T
Crimping Size	6 mm-64 mm
Electric Motor Power	4 KW/3 KW
Standard Voltage	380 V
Opening Without Dies	170 mm
Weight	300 kgs
Dimension L*W*H	710*500*810 mm

## APPLICATION:

Hose crimping machine is a kind of hydraulic equipment that used to withhold hose assembly. It is suitable for withholding high or low pressure hoses, air hose, water hose, and oil hoses of all kinds of machinery, widely used in vehicles, construction machinery, hydraulic machinery, welding and cutting equipment and other fields.
